

EverCharge Accel for Fleets

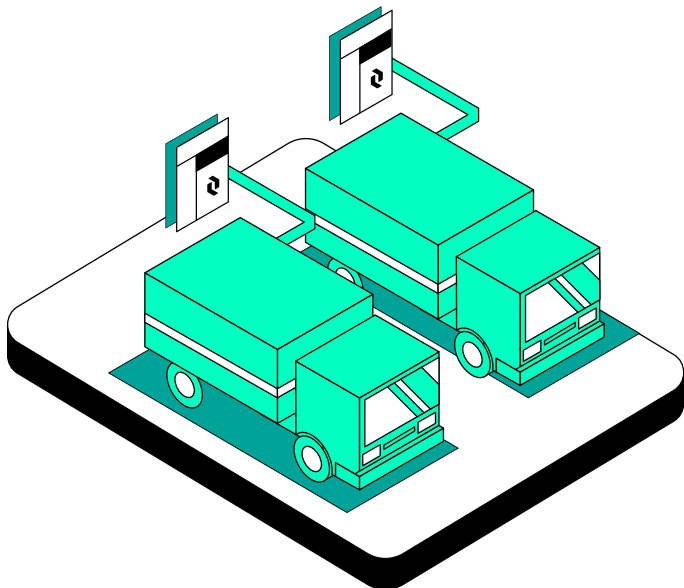

Your partner for all your charging
needs — from start to finish

EverCharge Accel

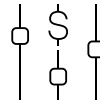

We get it. There's so much to think about when it comes to electrification – from the vehicle itself to the charging infrastructure and driver experience. The good news is that you don't have to do it alone. That's why we created EverCharge Accel.

While you choose the EVs that are right for your fleet, we'll lead the charge—from start to finish. The best part? You can get a headstart on planning your charging solution to help ensure that your infrastructure is ready to go when your EVs arrive.

Simplify

Simplify electrification with an all-in-one EV charging solution OEM whose solution works seamlessly with any vehicle and can be easily customized to your needs.

Accelerate

Get your EV fleet on the road faster – and that means more business for you.

Empower

Empower your teams with comprehensive charging insights to help optimize your business operations.

How It Works

You select your vehicles, we provide a customized charging experience—from hardware to operations.

01 Project Scoping Support

When discussing your project with your EV fleet provider, sign up for the EverCharge Accel program to receive custom, turnkey implementation expertise.

02 Site Evaluation & Design

During project scoping, we'll assess your charging needs, review existing infrastructure, perform a savings analysis, and design your charging infrastructure.

03 Deployment

We provide all the charging hardware and software, and take care of all the permits and installations so you can focus on your core business.

04 Ongoing Support

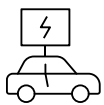

Our team is there from start to scale to support you from network management and billing to ongoing service and support.

05 Charging Insights

You'll have access to advanced features to manage your fleet's charging operations and get real-time charging analytics – from charging to full building energy management – to help optimize your business operations.

Trusted Partner to America's Largest Fleets

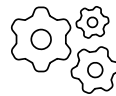

Backed by SK Group, a \$100B+ dollar conglomerate and one of the world's leading EV battery suppliers, our charging solutions power some of America's largest fleets.

Unmatched Technology

Maximize Infrastructure. Minimize Upgrades.

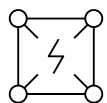

Our patented SmartPower technology enables you to install on average 5 to 10 times more charging stations on your finite electrical infrastructure. In addition, SmartPower lets you optimize the power usage of your building to minimize additional electricity charges.

Turnkey, Vertically- Integrated US Provider

We Are The OEM.

We design and build our solutions in the USA, and take care of everything for you from planning to implementation and ongoing support so you can focus on your core business with a peace of mind. And since we design and make our hardware and software, you'll have one vendor to call with questions.

Hyper-Customizable Solutions

We Don't Fit The Mold. We Make The Mold.

Our integrated approach across hardware, software and services eliminates the need for third party integrations and enables industry-leading customizations to simplify, streamline and optimize your operations.

Cross-Industry Ecosystem

From EV Charging To Battery.

As part of SK Group, a multi-billion dollar conglomerate and one of the world's leading EV battery providers, we're uniquely positioned to deliver cross-industry solutions through our SK ecosystem to help ensure the success of your electrification initiative—from battery to charging.

Your Partner For Every Step of the Electrification Journey

Since 2013, EverCharge has specialized in dynamic, real-time, and intelligent load management technology that **minimizes** the total cost and complexity of installation and management while **maximizing** the number of charging stations that can be installed. In 2022, EverCharge was acquired by SK Group, South Korea's second-largest conglomerate, as part of their multi-billion dollar investment in U.S. energy solutions and sustainable technologies.

The vertical integration of EverCharge's business model across engineering, manufacturing, and technology deployment allows EverCharge to develop tailored solutions specific for our customer's needs. Get in touch today.
