

# EverCharge Accel for Vehicle Manufacturers

Your partner in accelerating your  
customers' fleet electrification

# EverCharge Accel

Make it easier for your customers to say yes to fleet electrification and boost EV adoption by coupling electric vehicles with a turnkey charging solution.

Part of SK Group, a \$100B+ dollar conglomerate and one of the world's leading EV battery suppliers, EverCharge's charging solutions power some of America's largest fleets.

The best part? Since we make everything from hardware to software, our solutions work seamlessly with any vehicle and can be easily customized to your and your customers' needs, thus shortening testing times from months to days. And that means more electric vehicles on the road, faster.

## Simplify

Simplify electrification for your customers with an all-in-one EV charging solution OEM – without any extra effort from you.

## Accelerate

Accelerate your electric vehicle sales by maximizing charging output, and increasing the speed and ease of fleet deployment.

## Empower

Empower your customers with comprehensive data insights and services to help optimize their business operations.

# How It Works

You provide the vehicles, we provide the charging experience – from hardware to operations.

## 01 Project Scoping Support

When discussing an EV project with your customer, offer them participation in the EverCharge Accel program to receive custom, turnkey implementation expertise.

---

## 02 Site Evaluation & Design

During project scoping, we'll assess their charging needs, review existing infrastructure, perform a savings analysis, and design the charging infrastructure.

---

## 03 Deployment

We provide all the charging hardware and software, and take care of all the permits and installations so you and your customers can focus on your core business.

---

## 04 Ongoing Support

Our team is there from start to scale to support your customers from network management and billing to ongoing service and support.

---

## 05 Charging Insights

Your customers will have access to advanced features to manage their fleet's charging operations and get real-time charging analytics – from charging to full building energy management – to help optimize their business operations.

---

# Here's Why America's Largest Fleets Trust Us

## Unmatched Technology

### Maximize Infrastructure. Minimize Upgrades.

Our patented SmartPower technology enables your customers to install on average 5 to 10 times more charging stations on their finite electrical infrastructure. In addition, SmartPower lets them optimize the power usage of their building to minimize additional electricity charges.

## Turnkey, Vertically-Integrated US Provider

### We Are The OEM.

We design and build our solutions in the USA, and take care of everything from planning to implementation and ongoing support so your customers can focus on their core business with a peace of mind. And since we design and make our hardware and software, they'll have one vendor to call with questions.

## Hyper-Customizable Solutions

### We Don't Fit The Mold. We Make The Mold.

Our integrated approach across hardware, software and services eliminates the need for third party integrations and enables industry-leading customizations to simplify, streamline and optimize operations.

## Cross-Industry Ecosystem

### From EV Charging To Battery.

As part of SK Group, we're uniquely positioned to deliver cross-industry solutions through our SK ecosystem to help ensure the success of your and your customers' electrification initiative – from battery to charging.

# Your Partner In Accelerating Your Customers' Fleet Electrification Journey

Since 2013, EverCharge has specialized in dynamic, real-time, and intelligent load management technology that **minimizes** the total cost and complexity of installation and management while **maximizing** the number of charging stations that can be installed. In 2022, EverCharge was acquired by SK Group, South Korea's second-largest conglomerate, as part of their multi-billion dollar investment in U.S. energy solutions and sustainable technologies.

The vertical integration of EverCharge's business model across engineering, manufacturing, and technology deployment allows EverCharge to develop tailored solutions specific for our customer's needs. Get in touch today.

Let's partner to simplify and accelerate your customers' fleet electrification initiative.
