

Hospitality Charging Made Easy

A scalable, reliable, and fully-managed charging solution for your hospitality location.

evercharge.com

Unlocking the Value of EV Charging For Hotels

Nearly 20% of hotel guests expressed a need for EV charging stations at hotels, according to a [JD Power survey](#). The ability to charge your EV during your hotel stay has become a sought-after guest benefit, serving as a competitive advantage in retaining repeat visitors and attracting a new segment of travelers.

By offering convenient and seamless EV charging options, hotels can encourage guests to return and increase brand loyalty.

Plus, the addition of on-site charging solutions has the potential to unlock additional revenue streams for the hospitality industry when monetized effectively. For example, by integrating charging into existing loyalty programs or fixed fees for dedicated guest charging.

EverCharge's fully-managed hardware and software EV charging solutions means that we take care of the entire charging experience, so you can focus on maximizing business benefits and delivering a seamless guest experience.

When you work with us, you'll:

Save money

By allocating power in real time based on what each vehicle needs, EverCharge eliminates the need for expensive infrastructure upgrades – installing on average of 5-10x more stations at a lower cost.

Operate smoothly

We'll give you a turnkey solution with ongoing, full-service maintenance and real-time insights into the charging experience for project optimization.

Scale as needed

By leveraging the building's existing infrastructure, EverCharge can scale easily, quickly and efficiently.

SmartPower Technology

SmartPower allocates power in real time based on what each vehicle needs.

SmartPower Means Smart Charging

POWER ALLOCATION

TRADITIONAL EV CHARGING

Static, preset

SMARTPOWER EV CHARGING

Dynamic, demand based

POWER SOURCE

Dedicated to EV charging infrastructure, allocating power between a set number of charging stations on one circuit

Allocated to EV charging infrastructure, with ability to allocate power from multiple circuits as well as unused equipment anywhere in the building

CONNECTIVITY

Relies on a single access point in cellular network, which increases failure rate

Self sustaining, not reliant on a single access point, which significantly increases reliability

ONGOING MANAGEMENT

Exposed to unnecessary costs and energy overcapacity fees

Lowers risk of unnecessary costs and energy overcapacity fees

SCALABILITY

Difficult; requires complex and costly infrastructure upgrades

Quick and easy scaling built into technology without expensive infrastructure upgrades

Charging Management

GLANCE™, our all-in-one Charge Management System (CMS), takes managing and operating your EverCharge systems to the next level.

Real-Time Insights

GLANCE enables your team to view real-time charging data and reporting without integrations or expensive third-party hardware. This allows you to manage charging with access control, billing prioritization, optimized charging sessions, and customized charging experiences tailored to your guest and visitor needs.

New Stream of Revenue

Create opportunities for recurring revenue streams by opening up your charging stations to frequent visitors. This enables you to create a monetization structure that accelerates and increases your ROI, provides a charging solution for your surrounding community, and optimizes your existing land and infrastructure to work for you.

Energy Management

Set charging output limits to minimize or avoid additional utility demand charges, or to prioritize off-peak charging. When implemented throughout the entire site, additional underutilized electrical capacity can be leveraged.

End-to-End Customer Service

Expert Support

Our team assists customers through ROI calculations, sustainability benefit impacts, site assessment, design and deployment to meet your operational requirements. Our team provides ongoing maintenance and is experienced to model each option to determine the best solution within your budget.

YOUR JOURNEY WITH EVERCHARGE:

Site Evaluation	Discuss needs, identify electrical capacity, deliver existing infrastructure and saving analysis
Design and Approval	Receive custom proposal and installation options
Deployment	EverCharge is installed
Ongoing Support	Our team is there from start to scale – network management, support, billing and maintenance
Charging Insights	Customize system access, data management, and get charging analytics

Your Partner For Every Step of the Electrification Journey

Since 2013, EverCharge has specialized in dynamic, real-time, and intelligent load management technology that **minimizes** the total cost and complexity of installation and management while **maximizing** the number of charging stations that can be installed. In 2022, EverCharge was acquired by SK Group, South Korea's second-largest conglomerate, as part of their multi-billion dollar investment in U.S. energy solutions and sustainable technologies.

The vertical integration of EverCharge's business model across engineering, manufacturing, and technology deployment allows EverCharge to develop tailored solutions specific for our customer's needs. Get in touch today.
